How to Clear my Browser Cache

When browsing the internet, all browsers create a "cache" of files so the second time you visit a website, it loads faster. This results in faster loading time, but can sometimes show older content on websites instead of the updated version.

With our new move to the Cloud, it is highly suggested that you clear your cache to ensure you are getting the most accurate information displayed from our website.

In order to clear your cache, you can press **Ctrl-Shift-Delete** (Windows) or **Command-Shift-Delete** (Mac) in most browsers. If that doesn't work, please click on links below for further guidance.
